Granite Hill School's Behavior Management Program

At Granite Hill School, we believe that educational success depends largely on the development of social skills, and the desire to better one's self. Without social skills students cannot participate in the educational process in a meaningful way. Our model is not deficit-based, in other words, we do not view the student as disabled or emotionally troubled.

Instead, we use a contextual model, creating an environment whose social context is right for individual prosperity and student success. Future success also depends largely on the ability to interact successfully in a wide variety of social situations. Thus the development of pro-social skills is an essential cornerstone of our educational philosophy. Likewise, educational and life success is highly dependent on the content of one's character.

At Granite Hill School, we strive to develop the **R.I.G.H.T. Character** for each student we serve. The elements of a **R.I.G.H.T. Character** are:

- **R**espect – Treating all others with patience, understanding, and honor.
- **I**ntegrity – Acting in a manner that is responsible and accepting of responsibility.
- **G**ood Citizenship – Acting in a manner that promotes the common good.
- **H**onesty – Truthfulness in word and deed.
- **T**olerance – Willing to recognize and respect the differences between yourself and others

Granite Hill School strives to be a school of mutual respect and dignity. All of our staff have been trained in therapeutic techniques when working with disciplinary issues. The school provides an environment where students are encouraged to work through their issues and develop new behaviors for managing their emotions in the future. When a student's behavior warrants consequences, a communicative process is completed. This dialogue provides an opportunity for students to recognize what about their behavior was inappropriate. It is also a time to administer consequences that are logical for inappropriate behaviors. Our Code of Conduct outlines the expectations and possible consequences of a student's behaviors.

Conduct

Students are expected to be cooperative and respectful at all times. This respect and cooperation extend to all staff, students, and visitors. Examples of cooperation and respect are:

- Completing assignments and staff requests with a polite and positive demeanor.
- Participating in all aspects of the Granite Hill School program.
- Using appropriate language while avoiding subjects of a sexual or violent nature.

- Refraining from the use or possession of illegal substances, weapons, alcohol or tobacco.
- Refraining from aggressive acts of all kinds, including verbal aggression, threatening, and bullying.
- Following the rules of the school and the classroom.
- Remaining in the assigned classroom or area until dismissed by the staff.
- Being truthful in word and deed.
- Respecting the personal space and property of others.

Students who do not maintain appropriate conduct are subject to disciplinary action that may include the following:

- Loss of privileges
- Afternoon detention
- Restitution through community service
- In-school suspension
- Out of school suspension
- Suspension from activities, field trips, or athletics
- Expulsion from school

Refusal to accept the consequences of one's behavior may result in further disciplinary action.

Finally, the following behaviors are considered unacceptable and will result in an immediate consequence and most likely notification of the local police:

1. Physical assault or serious threats of assault.
2. Intentional damage to property.
3. Use or possession of a weapon, explosive (including fireworks), look-alikes, or anything which could reasonably be used as a weapon.
4. Use or possession of tobacco, any drugs other those prescribed (see Medication Policy), alcohol, snuff, or misuse of prescribed medication.

In extreme cases, staff may be required to intervene physically. These situations require therapeutic interventions designed to help a student regain control of themselves so that they and others may be safe. The selected staff has been trained through an approved model and utilizes the *Handle with Care* techniques. These techniques are used when a student is out of control and in danger of hurting themselves or others. Any student who requires this level of intervention may not be allowed to remain at Granite Hill School. An alternative placement will be found in which the student can receive that level of care.

In an attempt to avoid these situations or other consequences, Granite Hill School offers a behavioral program that consists of two components: the ISDP sheets and the Planning Room.

Individual Social Development Plan

(Also known as a student's ISDP or "point sheet")

In order to assist students in achieving the social skills that will be needed for success in adult life, each student has an Individual Social Development Plan. The ISDP's provide a way for students to be recognized for their pro-social behaviors. This individual plan identifies goals for each student. During our intake process, Achenbach Behavioral rating scales are completed from the previous teacher, the parent(s), and the student. This information is then scored and translated into specific behavioral goals for the student ISDP so that the student can earn points towards each period of the day. Earned points may be redeemed for special trips and activities on Friday during Rewards. The daily data is tallied to determine whether a student has reached their weekly percentage and thus able to receive a reward at the end of the week. The student selects a reward of choice relative to their earned Level for that week. There are four Levels of Rewards: A, B, C, and Non-Rewards). The Levels are determined by the number of points earned in combination with any incident reports or other disciplinary actions that may have occurred during the week. Granite Hill School staff makes every effort to provide students with activities that they select or would prefer. Those who do not earn enough points for the week (Non- Rewards), remain at the school, and complete Social Skills activities in a classroom setting.

The data from these ISDP sheets are collected and used to determine multiple aspects of a student's program. The weekly data is averaged for a monthly assessment of how a student is behaving, and the monthly reports are used for a continual year-long analysis.

The Planning Room

The Planning Room is an integral part of Granite Hill School's Behavior Management Program. The Planning Room is available for students to access at all times. A Master's level behavioral specialist manages the Planning Room program and is readily available to work with students. The students are taught how to identify and regulate their emotions using the Social Problem Solving model of theorists Elias and Tobias. Additionally, students are given the opportunity to learn the benefits of brainstorming and identifying positive and negative outcomes to their choices.

- Students can choose to enter the Planning Room as a self-regulatory skill:
 - ✓ To remove themselves from a potentially negative or troublesome situation.
 - ✓ To take a time out
 - ✓ To discuss dilemmas they may be experiencing

OR

- Students can be sent to the Planning Room for inappropriate behavior:
 - ✓ Students are required to process the situation that resulted in them being sent.

- ✓ Students are required to identify their feelings and actions.
- ✓ Students, with the help of staff, are required to develop a plan to respond differently and more appropriately in the future.

Once a student has demonstrated a willingness to return to class, and the student has dialogued with the Planning room staff, the student may return to the classroom and continue participating with their classmates. The classroom teacher receives an overview of the Planning Room visit by phone call, and the visit itself is documented on the back of the student's ISDP. The Behavioral Specialist will also follow-up with the teacher - outside of class time- to ensure that the student's behavioral needs were met. The behavioral specialist documents the frequency and purposes of all visits. This data is used to help meet the behavioral needs of both the individual students and the students as a whole.

Granite Hill School Cell Phone/Electronic Devices Policy

Cellular phones and personal communication devices are prohibited during the school day

The NH Department of Education passed RSA 189-1a (2025), which prohibits students from using a personal electronic communication device during the academic day, from "bell to bell." Personal electronic communication devices are defined as electronic devices that are capable of making calls, transmitting pictures or video, or sending and receiving messages. This includes all types of phones, such as flip phones and non-smart phones, as well as tablets and wearable devices like smartwatches.

Students are prohibited from having a personal electronic communication device on their person during the academic day from bell to bell. Bell to bell is defined as the period from the start of the school day (8:30 am) to the end of the school day (2:00 pm).

Any such item must be stored in the school-designated area during the school day. Such items should not be carried on the person, in a backpack, or in any other bag. Granite Hill will provide a locked space for all students to store their devices. All students will place their device(s) in their labeled slot as soon as they enter the school building.

Communication during emergency conditions: All staff members have access to communication devices during instructional time and can contact the school office should emergency conditions arise.

Personal wired headphones that plug directly into the school-issued Chromebook/computer will be allowed for instructional purposes as assigned by the teacher when using the school-issued device.

Discipline of students

If a student violates this policy and is found to have a device during school hours, they will be referred to the administration for further action. The student will be asked to turn in the device. If the student refuses, parents/guardians will be notified, and further disciplinary action will be explored. Students who are habitually found to be in possession of their electronic devices may be suspended from school and will be required to attend a re-entry meeting and develop a plan to return.

Teachers and staff members

1. Teachers and staff members will enforce the terms of this Regulation as well as other applicable regulations and policies in a consistent and fair manner.
2. Teachers will not be required to confiscate a personal communication device from a student who is in violation of this Regulation. Students will be sent out of class to the Administration.
3. A staff member will be at the door at the beginning of each school day to assist with the collection and securing of devices from students.
4. Students may not be authorized to use personal communication devices to fill instructional time or to occupy students in lieu of providing instructional activities or as a reward.

Granite Hill School, with the NH Department of Education, is dedicated to providing a distraction-free environment that will help students stay present at school and free from the constant interruptions of personal devices. Google Workspace for Education is a set of education productivity tools from Google including Gmail, Calendar, Docs, Classroom, and more used by tens of millions of students and teachers around the world. At Granite Hill School, students will use their Google Workspace for Education accounts to complete assignments, communicate with their teachers, sign into their Chromebooks, and learn 21st century digital citizenship skills.

The notice below provides answers to common questions about what Google can and can't do with your child's personal information, including:

What personal information does Google collect?

How does Google use this information?

Will Google disclose my child's personal information?

Does Google use student personal information for users in K-12 schools to target advertising?

Can my child share information with others using the Google Workspace for Education account?

Please read it carefully, let us know of any questions, and then sign below to indicate that you've read the notice and give your consent. If you don't provide your consent, we will not create a Google Workspace for Education account for your child but will need to have further discussion as Granite Hill School is a Google Platform school.

Thank you,
Granite Hill School

I give permission for Granite Hill School to create/maintain a Google Workspace for Education account for my child and for Google to collect, use, and disclose information about my child only for the purposes described in the notice below.

Google provides information about the information it collects, as well as how it uses and discloses the information it collects from Google Workspace for Education accounts in its Google Workspace for Education Privacy Notice. You can read that notice online at https://workspace.google.com/terms/education_privacy.html You should review this information in its entirety, but below are answers to some common questions:

What personal information does Google collect?

When creating a student account, Granite Hill School may provide Google with certain personal information about the student, including, for example, a name, email address, and password. Google may also collect personal information directly from students, such as a telephone number for account recovery or a profile photo added to the Google Workspace for Education account.

When a student uses Google core services, Google also collects information based on the use of those services. This includes:

- account information, which includes things like name and email address.
- activity while using the core services, which includes things like viewing and interacting with content, people with whom your student communicates or shares content, and other details about their usage of the services.
- settings, apps, browsers & devices. Google collects information about your student's settings and the apps, browsers, and devices they use to access Google services. This information includes browser and device type, settings configuration, unique identifiers, operating system, mobile network information, and application version number. Google also collects information about the interaction of your student's apps, browsers, and devices with Google services, including IP address, crash reports, system activity, and the date and time of a request.
- location information. Google collects information about your student's location as determined by various technologies such as IP address and GPS.
- direct communications. Google keeps records of communications when your student provides feedback, asks questions, or seeks technical support

The Additional Services we allow students to access with their Google Workspace for Education accounts may also collect the following information, as described in the [Google Privacy Policy](https://policies.google.com/privacy) (<https://policies.google.com/privacy>):

- activity while using additional services, which includes things like terms your student searches for, videos they watch, content and ads they view and interact with, voice and audio information when they use audio features, purchase activity, and activity on third-party sites and apps that use Google services.
- apps, browsers, and devices. Google collects the information about your student's apps, browser, and devices described above in the core services section.
- location information. Google collects info about your student's location as determined by various technologies including: GPS, IP address, sensor data from their device, and information about things near their device, such as Wi-Fi access points, cell towers, and Bluetooth-enabled devices. The types of location data we collect depend in part on your student's device and account settings.

How does Google use this information?

In Google Workspace for Education Core Services, Google uses student personal information primarily to provide the core services that schools and students use, but it's also used to maintain and improve the services; make recommendations to optimize the use of the services; provide and improve other services your student requests; provide support; protect Google's users, customers, the public, and Google; and comply with legal obligations. See the [Google Cloud Privacy Notice](https://cloud.google.com/terms/data-processing-addendum) (<https://cloud.google.com/terms/data-processing-addendum>) for more information.

In Google Additional Services, Google may use the information collected from all Additional Services to deliver, maintain, and improve our services; develop new services; provide personalized services; measure performance; communicate with schools or users; and protect Google, Google's users, and the public. See the [Google Privacy Policy](https://policies.google.com/privacy) (<https://policies.google.com/privacy>) for more details.

Does Google use student personal information for users in K-12 schools to target advertising?

No. There are no ads shown in Google Workspace for Education core services. Also, none of the personal information collected in the core services is used for advertising purposes.

Some additional services show ads; however, for users in primary and secondary (K12) schools, the ads will not be personalized ads, which means Google does not use information from your student's account or past activity to target ads. However, Google may show ads based on general factors like the student's search queries, the time of day, or the content of a page they're reading.

Can my child share information with others using the Google Workspace for Education account?

We may allow students to access Google services such as Google Docs and Sites, which include features where users can share information with others or publicly. For example, if your student shares a photo with a friend who then makes a copy of it, or shares it again, then that photo may continue to appear in the friend's Google Account, even if your student removes it from their Google Account. When users share information publicly, it may become accessible through search engines, including Google Search.

Will Google disclose my child's personal information?

Google will not share personal information with companies, organizations and individuals outside of Google except in the following cases:

With our school: Our school administrator will have access to your student's information. For example, they may be able to:

- View account information, activity and statistics;
- Change your student's account password;
- Suspend or terminate your student's account access;
- Access your student's account information in order to satisfy applicable law, regulation, legal process, or enforceable governmental request;
- Restrict your student's ability to delete or edit their information or privacy settings.

With your consent: Google will share personal information outside of Google with parental consent.

For external processing: Google will share personal information with Google's affiliates and other trusted third party providers to process it for us as Google instructs them and in compliance with our [Google Privacy Policy](#), the [Google Cloud Privacy Notice](#), and any other appropriate confidentiality and security measures.

For legal reasons: Google will share personal information outside of Google if they have a good-faith belief that access, use, preservation or disclosure of the information is reasonably necessary for legal reasons, including complying with enforceable governmental requests and protecting you and Google.

What choices do I have as a parent or guardian?

First, you can consent to the collection and use of your child's information by Google. If you don't provide your consent, we will not create a Google Workspace for Education account for your child, and Google will not collect or use your child's information as described in this notice.

If you consent to your child's use of Google Workspace for Education, you can access or request deletion of your child's Google Workspace for Education account by contacting Sarah Atwood at sarah@granitehillsschool.org. Please remember that GHS is a Google Platform school and cannot properly access their education without permission to use this platform. If you wish to stop any further collection or use of your child's information, you can request that we use the service controls available to access personal information, limit your child's access to features or services, or delete personal information in the services or your child's account entirely. You and your child can also visit <https://myaccount.google.com> while signed in to the Google Workspace for Education account to view and manage the personal information and settings of the account.

What if I have more questions or would like to read further?

The principal shall report to the parents of a student who has been reported as a victim of bullying and to the parents of a student who has been reported as a perpetrator of bullying within 48 hours of receiving the report. **Investigative Procedures (RSA 193-F:4,
II(j))**

1. Upon receipt of a report of bullying, the principal shall, within 5 school days, initiate an investigation into the alleged act. 4. A maximum of 10 school days shall be the limit for the initial filing of incidents and completion of the investigative procedural steps.
5. Factors the principal or other investigator may consider during the course of the investigation, including but not limited to:

Description of incident, including the nature of the behavior;

Consequences and appropriate remedial actions for a student or staff member who commits one or more acts of bullying or retaliation may range from positive behavioral interventions up to and including suspension or expulsion of students and dismissal from employment for staff members. Consequences for a student who commits an act of bullying or retaliation shall be varied and graded according to the nature of the behavior, the developmental age of the student, and the student's history of problem behaviors and performance. Remedial measures shall be designed to correct the problem behavior, prevent another occurrence of the problem, protect and provide support for the victim, and take corrective action for documented systematic problems related to bullying.
